

# TABKEEPER COOKIE POLICY

Version 1.1 · Effective Date: July 26, 2026 · Last Updated: August 10, 2026 This Cookie Policy explains how Tabkeeper Inc. ("Tabkeeper," "we," "us") uses cookies and similar technologies on tabkeeper.io, its subdomains, and the Tabkeeper web and mobile applications. It supplements Section 6 of our Privacy Policy and is part of the Tabkeeper Legal Framework. Capitalized terms not defined here have the meanings given in Section 3 of the Terms of Service.

**1. What Cookies Are** Cookies are small text files placed on your browser or device when you visit a website. Similar technologies include pixels, local storage, session storage, and mobile software development kits (SDKs). Together, these let a service recognize your browser or device, keep you signed in, remember preferences, measure usage, and detect errors and fraud. In this Policy we call all of these "cookies."

**2. How We Use Cookies** We use cookies for three purposes only. We do not use advertising cookies, and we do not permit third-party ad networks to collect information through the Services for targeted advertising.

2.1 Strictly Necessary. Required for the Services to function: signing you in and keeping your session active, securing the platform, preventing fraud, routing traffic, and remembering essential state (such as your active Workspace). These cannot be switched off through our controls; blocking them in your browser will prevent core parts of the Services from working.

2.2 Preferences. Remember choices you make — display settings, saved views, language, and similar options — so you don't have to re-enter them.

2.3 Analytics and Performance. Help us understand how the Services are used and how they perform, so we can fix problems and improve. These include product analytics and error monitoring provided by the vendors in the table below.

**3. Cookies and Technologies We Use** The specific cookies in use vary as the Services evolve; the table below describes the categories and representative technologies currently in use.

| Category           | Set By                                    | Purpose                                                                                                                                                       | Typical Duration     |
|--------------------|-------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| Strictly necessary | Tabkeeper                                 | Supabase Authentication, session management, security, Workspace state                                                                                        | Session to 30 days   |
| Strictly necessary | Stripe (e.g., __stripe_mid, __stripe_sid) | Payment processing and fraud prevention during direct checkout and billing, where offered (in-app purchases are processed by Apple without Tabkeeper cookies) | 30 minutes to 1 year |
| Strictly necessary | Cloudflare (e.g., __cf_bm)                | Traffic security, bot detection, load balancing                                                                                                               | Up to 30 minutes     |
| Strictly necessary | Plaid                                     | Secure bank-connection flow when you link a Connected Financial Account                                                                                       | Session              |
| Preferences        | Tabkeeper                                 | Display and product preferences                                                                                                                               | Up to 12 months      |
| Analytics          | Google Analytics (e.g., _ga)              | Usage measurement and site analytics                                                                                                                          | Up to 24 months      |
| Analytics          | Mixpanel; PostHog                         | Product analytics — features used, flows completed                                                                                                            | Up to 12 months      |
| Analytics          | Sentry                                    | Error and crash reporting, performance monitoring                                                                                                             | Session              |
| Email              | Resend                                    | Delivery and open/bounce measurement for emails we send                                                                                                       | N/A (email-based)    |

Mobile applications may use equivalent SDKs from the same vendors for authentication, analytics, crash reporting, and notifications.

**4. Your Choices**

4.1 Browser Controls. You can block or delete cookies through your browser settings, and set your browser to reject some or all cookies. Blocking strictly necessary cookies will prevent the Services from working properly.

4.2 Analytics Opt-Outs. You can limit analytics through any cookie preference controls we make available in the Services, through your browser, and through vendor tools such as the Google Analytics opt-out browser add-on.

4.3 Opt-Out Preference Signals. Where required by Applicable Law, we honor recognized opt-out preference signals, such as the Global Privacy Control, for the browser or device on which the signal is set. Our systems do not respond to other "Do Not Track" signals, for which no common standard exists.

4.4 Mobile Settings. Your device settings let you manage app permissions and push notifications, and reinstalling or clearing app data resets locally stored identifiers.

**5. Changes to This Policy We may update this Cookie Policy as our technologies and vendors change. The "Last Updated" date above reflects the current version, and material changes will be notified as described in the Privacy Policy and Section 55 of the Terms of Service.
